

S)V 1977 Index

This is the cumulative index for Volume 11 of *Sound and Vibration*, January thru December 1977. The index is divided into three parts: a chronological listing of issues with titles of major editorial items and authors in order of publication in each issue; a key word index citing month and page number of publication; and an alphabetical index of authors.

Limited quantities of many back issues of S)V are available at \$1.00 per copy. Please send your order with remittance or purchase order to: Sound and Vibration, P.O. Box 9665, Bay Village, OH 44140. All back issues including those that are out-of-print are available in microfilm or photocopy from: University Microfilms, 300 N. Zeeb Rd., Ann Arbor, MI 48106.

PINK NOISE

Oaktron's AI-10. The tested speaker system for controllable speech privacy in open office planning.

The AI-10 system provides acoustical privacy in the open office, library, etc. from one work zone to the next without stifling speech clarity within each work zone. Patented Lahti Pressure Velocity principle gives a pleasant, constant whisper of sound - renders distracting conversations unintelligible. Can also be used for simultaneous paging and music.

The AI-10's greater dispersion efficiency means that fewer units are necessary, each unit controlling 250 sq. ft. on average. Now in use in over 1,500,000 sq. ft. of office space. Meets GSA requirements as stated in Public Building TB-2. **Write or call today for more information.**

ELECTRONIC FILTER MODEL 4111

ITHACO

The predictable filter.

Get $\pm 1\%$ gain, $\pm 1\%$ frequency and $\pm 2^\circ$ phase accuracy. 24 dB/octave. From .01 Hz to 1 MHz. With tenth decade step switch positions for repeatability. Available as shown or dual low-pass.
